

Hoburne Dental Practice Newsletter

SPRING 2010

Welcome

Welcome to our first ever newsletter aimed at keeping you up to date with news at the surgery and developments in dentistry. We are always keen to get feedback from you about new ideas at the practice, so please let us know your thoughts.

Last year saw the revamping of our website. This was so successful that we managed to win an award from www.dentistry.co.uk for most improved website! If you need to find out information about the practice or the services we

offer do have a look at www.hoburne-dental.co.uk.

Wendy Rowley has just started at the practice as a hygienist one day a week. Wendy replaces Gabbie who had been with us for 9 years.

Wendy is a very experi-

enced hygienist. She worked at her previous practice for 29 years before moving down to the south coast last year.

Another new face at the practice is Sharon, who started with us in November as an additional member of our dental nursing team.

M&S vouchers for recommending us!

We often say to our patients that if they are happy with our service then let others know about us. Over the years we have noted that friends of friends are more likely to become regular patients at the practice.

This year we have decided to say thank you for any successful recommendation you make with a £15 Marks & Spencer gift voucher. We are always extremely grateful for recommendations, so please don't hesitate to pass on a good word!

The vouchers will be sent to you once the recommended patient attends the practice and mentions your name. You can recommend as many patients as you like!

This offer applies to adult new patients over the age of 18 and not to children.

Please see website or contact the practice for full details.

Digital X-rays

Hoburne
DentalPractice

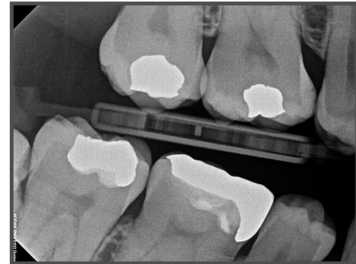

'Modern Dentistry for all
the family'

104 Saffron Drive
Highcliffe
Christchurch
Dorset

Web: www.hoburne-dental.co.uk

We have been using digital radiographs (x-rays) for over 2 years now. This new technology gives an instant high quality image of the teeth at the click of a button. Waiting for films to be developed is now a thing of the past. Patients benefit from the fact that this

technology produces 70% reduction in radiation dose compared to the older film type x-rays.

Staff Baby Boom!

There has been something of a baby boom at the practice since last November when Chris became the proud father of number 5!

Leigh gave birth to a little boy in November too. Leigh will be

returning to the practice later this year.

Peter's wife is expecting their first child quite literally any time now. Both Kelly (hygienist) and Leianne (therapist) are pregnant.

Jonathon's wife is also pregnant with their first child expected in the summer.

The birth rate is currently rising nationally and it seems that Hoburne Dental Practice is no exception!

TOOTH WHITENING

Tooth whitening is a popular treatment. The process lightens your smile and helps to improve appearance without any drilling!

The concept of tooth whitening has been around since the 1960's. The treatment uses a peroxide gel and can either be done at home by yourself over a couple of weeks or alterna-

tively in surgery in just 2 hours.

The results are long lasting. Most people find they only need to top up their colour

after 2-3 years. Topping up is much faster than first time treatment.

Take a look at your teeth and smile, if there is something you would like to change please do mention it to us. Cosmetic treatments can often be very simple and affordable and can produce a dramatic change.
